

[Command Reference](#) > [SCPI Command Reference](#) > [MMEMory Commands](#) > MMEMory:DATA

**MMEMory:DATA** <Filename>[, <DataBlock>]

Loads a <DataBlock> into the file <FileName>.

**Parameters:**

<Filename>                      String parameter to specify the name of the file.

<DataBlock>                    <block\_data>  
Data in IEEE488.2 block data format. The delimiter EOI must be selected to achieve correct data transfer.

**Example:**                      MMEM:DATA? 'C:\Users\Public\TEST01.HCP'  
Query the block data contained in file TEST01.HCP.
