

[Command Reference](#) > [SCPI Command Reference](#) > [\[SENSe:\] Commands](#) > [\[SENSe:\] CORRection...](#) > [\[SENSe<Ch>:\]CORRection:COLLect:AUTO:ASSignment<Asg>:ACQuire](#)  
**[\[SENSe<Ch>:\]CORRection:COLLect:AUTO:ASSignment<Asg>:ACQuire](#)**

Starts the automatic calibration sweep for the indicated channel and port assignment.

A complete, valid set of port assignments must be defined before you can initiate a calibration.  
See "[Multiple Port Assignments](#)" for background information.

**Suffix:**

<Ch>                      Number of the calibrated channel

<Asg>                    Number of the port assignment

**Example:**              See [\[SENSe<Ch>:\]CORRection:COLLect:AUTO:ASSignment<Asg>:DEFine](#)

**Usage:**                Event

**Manual operation:**   See "[Start Cal Sweep / Abort Sweep](#)"
