MMEMory:STORe:CORRection <Channel>, <CalGroupFile>

Copies the correction data of channel <Channel> to the cal pool, generating a new correction data file (cal group). The file has the extension *.cal and is stored in the C:\Users\Public\Documents\Rohde-Schwarz\Vna\Calibration\Data directory.

Setting parameters:

<Channel>	Channel number
<CalGroupFile>	String parameter to specify the name of the created cal group file. There is no need to specify the directory path and file extension; the analyzer uses the default cal pool directory C:\Users\Public\Documents\Rohde-Schwarz\Vna\Calibration\Data and a *.cal extension.

Example: See [MMEMory:LOAD:CORRection](#)

Usage: Setting only

Manual operation: See ["Add / Add All / Replace / Apply / Apply to All"](#)
